

Partner Meeting - Oct 14, 2024

Location & Attendees

- Location: Online via Discord
- Time: 5:00 pm
- Present: Terry, Jaeyong, Kevin, Danny, Daria, Morris, Sam, Sheldon Huang (Partner), Yuchen Wang (partner)
- Absent: None

Todo

- Go through each sub team in order and show off work that has been done. Ask any clarifying questions and receive feedback on what has been done so far.
- Clarify diagram visualization elements - what information is to be included in popups and sidebars.

Notes and Feedback

Story 1

- Good progress has been made, pages look good visually.
- Firebase set up looks good, it speeds up development.
 - Ensure to implement login with Google as that is a feature we still need.
- Overall on track.

Story 2

- Some feedback on the visualization of graph nodes and identifying causal paths
 - Looks good so far, the popups on each node can use some more information.
 - Causal paths should be identified when nodes are clicked.

Story 3

- Everything looks good so far but we can add more to the search / filter system functionality for further utility.
 - A more specific tagging system in the backend to speed up the search process and make all uploaded graphs more searchable.
 - Add search capability through JSON properties.
 - Add searching by other graph metadata
 - author, theme, popularity, etc.

Next Meeting Details

- October 21, 2024 online via Discord tentatively.
 - If there are no major updates or questions, we've agreed to send a message on discord instead.
